

A Series 3-Wheel Stand-up Counterbalanced Lift Truck

with capacity of 3,000 to 5,000lbs

The World of Hangcha

**Tough/
Reliable/
Smart**

Appearance

- / Space-saving design allows the truck to stack and retrieve goods efficiently in narrow aisles and at high lift heights.

Comfort

- / The stand driving mode is applicable. The step is low for conveniently getting on and off.
- / An anti-fatigue floor mat, generous padding for knees, hip and arms and spacious compartment keep operators comfortable over long shifts.
- / Spacious operator compartment provides a comfortable work environment for the operator.

High Performance

- / Thanks to the advanced front dual-drive AC motor, the traveling performance and the maneuverability are greatly improved as well as the operating efficiency.
- / HANGCHA's AC hydraulic system provides smooth load handling and precise load placements.
- / With the electric proportional multi-way valve, the energy consumption can be effectively reduced.

Safety

- / Cornering speed control automatically slows the forklift's travel speed while turning to help prevent damage to loads.
- / With the foot-raising type braking pedal, operation is easier.
- / The EPB(Electronic Parking Brake) improves the safety of the truck greatly.
- / With the pedal sensing system, the truck can be driven only if the driver stands on the pedal. After the operator leaves the truck, active braking is initiated to prevent accident.

Reliability

- / EPS (Electric Power Steering) promotes precise steering control with minimal effort, without encroaching into the operator compartment.

Wide mast provides perfect visibility and hydraulic cushioning provides confident and smooth load handling

Driver-Friendly Environment: The truck is designed for side stance operation and maximum driver comfort while traveling in either forward or reverse. The back and elbow supporting cushions can provide better support for the driver

Battery side roll out is the standard configuration, and the truck can adapt to both BCI and BS standard battery

The intuitive, multifunction control handle is centrally positioned for easy access to truck functions and offers simultaneous control of drive, lift, lower and auxiliary hydraulic functions

Standard specification

- / AC dual drive motors
- / AC pump motor
- / Multiple operation modes
- / EPS system
- / Regenerative braking
- / EPB(Electronic Parking Brake)
- / Cornering speed control
- / Operator Presence Sensing (OPS)
- / Shock-absorption pedal
- / Waist and elbow supporting cushion
- / Multi-functional and integrated instrument
- / Smooth cushion tires
- / Emergency power-off switch
- / Integrated operating handle
- / Quadruple and multi-way valve
- / 117" duplex mast
- / Electric horn
- / Cup holder and file holder
- / Low noise gear pump
- / 36V BS standard battery
- / Soft landing system
- / Battery side extraction

Options

- / LED work lights
- / Strobe light
- / Blue safety light
- / Sideshifter
- / Full free duplex mast
- / Full free triplex mast
- / Forks of several lengths
- / Attachments
- / Widened load bracket and fork carriage
- / Lower type overhead guard
- / Charger
- / Freezer
- / Password/card reading access system
- / 12V socket
- / USB charging output
- / Overhead fan
- / Fire extinguisher
